Save the Planet. Save Money. Same Performance!

Our eco-friendly switches use up to 50% less power than the market leader, without sacrificing functionality and performance.*

Without the latest Allied Telesis eco-friendly switches, many IT and Finance managers my be turning green in the face, when they see the size of power costs needed to power their IT solutions.

With the lowest operating power in the industry, Allied Telesis switches can dramatically reduce your running costs, whilst providing all the functionality needed for todays high performance IT networks.

Don't be fooled by the green marketing hype put out by many of our competitors.

Read the small print on actual power consumption, or in the case of Allied Telesis products, read the large print.

eco friendly
