RUCKUS PRODUCT GUIDE

CONTROL AND MANAGEMENT

| | WLAN Controller | Controller-Less | Cloud |
|---------------------------------|---|---|--|
| |  |  |  |
| Feature | ZoneDirector 1200 | Unleashed | RUCKUS Cloud |
| Number of APs supported | Up to 150 | Up to 50 | Virtually unlimited number of APs supported |
| Number of switches supported | — | Up to 8 switches | Virtually unlimited number of switches supported |
| Clients | Up to 4,000 | up to 1,024 | Clients per AP: refer to AP data sheet |
| Ethernet ports | 2 Ethernet ports, auto MDX, autosensing 1GbE | Refer to selected AP data sheet | N/A |
| Authentication support | 802.1X, Local database, Active Directory, RADIUS, LDAP | 802/1x, local database, Active Directory, RADIUS, LDAPr | PSK, 802.1x, Active Directory, RADIUS, LDAP, SMS, social login, open |
| Guest networking/captive portal | ✓ | ✓ | ✓ |
| DHCP server | ✓ | ✓ | External or assigned |
| AP discovery and control | L2 / L3 | L2 | L2 |
| SSID/WLAN support | 256 | 16 | 15/Venue |
| Management Interface | Web GUI, FlexMaster | Web GUI, CLI, Unleashed Multi-Site Manager | Web GUI and native mobile application |
| Remote Management | No | Yes | Yes |
| Management protocol(s) | SNMP v3 | SNMP v3 | N/A |
| VLAN support | Dynamic VLANs | Yes | Dynamic VLANs |
| Data Plane | Tunneling or local breakout | Local breakout | Local breakout |
| Power supply | DC or AC | PoE | APs powered using PoE or optional power supply |
| Fans | — | N/A | N/A |
| SKU/Part number | 901-1205-XX00 | Refer to Unleashed data sheet for supported devices | Refer to RUCKUS Cloud data sheet for supported devices |

| | SmartZone |
|---|--|
| |  |
| | SmartZone Data Plane |
| Secured data plane tunneling | Enables forwarding of user data traffic through secure tunnels on RUCKUS APs when managed by Virtual SmartZone controllers. |
| Multiple hypervisor support | Supports the most widely deployed VMware and KVM hypervisors |
| NFV flexible architecture | Complete separation of Control+Management plane (vSZ) and data plane functions (SmartZone Data Plane) via separate VMs that support distributed and centralized deployments providing compelling architecture flexibility. |
| Works seamlessly with virtual SmartZone | vSZ acts as the controller for RUCKUS APs as well as SmartZone Data Plane providing seamless configuration and management capabilities. |
| Up to 10 SmartZone Data Planes per vSZ and up to 40 SmartZone Data Planes per cluster | The vSZ controller runs in Active/Active (3+1) mode for extremely high availability. Each SmartZone Data Plane runs as an independent virtual machine instance that is managed by the vSZ controller. |
| vSZ Zone affinity for SmartZone Data Plane | This feature enables RUCKUS APs in a particular zone establish tunnels with the SmartZone Data Plane in that particular zone. Provides flexibility for distributed and managed services deployments where the SmartZone Data Planes can be co-located on-premise with RUCKUS APs (vSZ Zones) on medium/large high density sites that need tunneling. With up to 40 SmartZone Data Planes per cluster, the SZ 3.5 release can potentially support a large number of such distributed deployments. |
| DHCP server and NAT | This feature enables a high scale DHCP Server on the SmartZone Data Plane. The DHCP Server is a high-scale server specifically designed and architected for Wi-Fi deployments that provide near-real time IP address assignment combined with NAT this provides tremendous value to the operator since it avoids mac-address scaling limits and high costs on the network infrastructure (switches). |
| Legal Intercept | This feature is useful from a Legal Intercept requirements perspective and enables the ability to mirror packets in both uplink and downlink directions for Wi-Fi clients that have a CALEA warrant. |
| Support for northbound tunnels L2oGRE | This feature enables SmartZone Data Plane to forward WiFi client traffic to a specified 3rd party WAG (Wireless Access Gateway) over L2oGRE protocol standard. |
| IPv6 support | Supports IPv6 addressing for the SmartZone Data Plane interfaces as well as support forwarding of IPv6 client traffic |
| L3 Roaming (inter SmartZone Data Plane tunnels) | This feature enables L3 Roaming when traffic is tunneled to the SmartZone Data Plane. The feature relies on inter SmartZone Data Plane flexi-vpn tunnels that are dynamically created with minimal user intervention. L3 Roaming can be enabled based on VLANs or subnets. |

¹ Stacking and Campus Fabric not supported on ICX7150-C08P.

² Available in a future software release.

| Network Monitoring | | |
|--|---|---|
| Network Director (Centralized Inventory Management software) |  | Network Director provides a robust single-pane-of-glass view of your entire converged RUCKUS Wi-Fi and switch network. Network Director provides multi-cluster inventory control and management of all SmartZone network controllers for improved tracking and manageability. |
| RUCKUS Unleashed Multi-Site Manager |  | Unleashed Multi-Site Manager provides a single-pane-of-glass view of Unleashed networks deployed across multiple locations. It simplifies deployment, monitoring and management of Unleashed access points and ICX switches. |
| Software | | |
| IoT Suite (Internet of Things Management server) |  | RUCKUS IoT Suite is a software controller that support IoT devices from the RUCKUS IoT Ecosystem. Our IoT Ecosystem partners offer panic buttons, door locks, thermostats, etc. running BLE, Zigbee, Bluetooth, LoRA, etc. wireless interfaces. |
| RUCKUS Analytics (Service Assurance) |  | RUCKUS Analytics is a cloud service for network analytics and assurance. Powered by machine learning and artificial intelligence, it gives IT comprehensive visibility into network operations and accelerates troubleshooting. RUCKUS analytics delivers powerful incident analytics and automated health monitoring among other things to enable IT to meet their network service level agreements (SLAs). |
| SmartCell Insight (SCI) (Reporting and Dashboards) |  | RUCKUS SmartCell Insight is software that delivers detailed reporting and informative dashboards for your RUCKUS network. It aggregates data from applications, users, devices, access points, controllers and switches to provide visibility into network operations. The software helps you to manage the network more effectively and improve user experience. |
| Cloudpath Enrollment System (Secure Network Access) |  | RUCKUS Cloudpath Enrollment System is a cloud service (or on-premises software) that delivers secure network access for any user, and any device, on any network. It streamlines network onboarding and authentication for BYOD, guest users and IT-owned devices—including IoT devices. The service increases security and reduces IT workload while providing a great end-user connectivity experience. |
| Smart Positioning Technology SPoT (Location engine and analytics software) |  | The RUCKUS real-time location engine and analytics software enables retailers, stadiums, and transportation hubs to enhance the way they interact with customers based on precise location. Deployed on top of RUCKUS Smart Wi-Fi, the RUCKUS SPoT does not require any additional hardware and has unlimited scalability in the cloud. Send real-time travel updates, targeted promotions, and even classroom notes through footfall traffic and proximity analytics to enrich customer relationships. |
